## Switchmode power supply **OPEN FRAME**

All products conform to IEC 60601-1,  
 IEC 60950 and IEC 61558.

## HERC175 MEDICAL POWER SUPPLY

### Characteristics

- High efficiency: up to 94%
- Low no load power consumption <210mW
- Low leakage current ≤100µA
- IEC 60601-1-2, 4th edition ready
- Wide operating temperature range 0 - 70°C
- Wide input voltage range 85 - 264 VAC
- Isolation 2x MOPP
- Operating altitude 5000m
- Convection cooled 120 W / Forced cooled 175 W
- EN 55011/32 Class B conform

### HERC175 175W MEDICAL POWER SUPPLY

FRIWO is revolutionizing its existing open-frame product portfolio by adding the new product line „HERC“. The product name stands for “High Efficiency and Rapid Customization” and features two essential characteristics of the compact built-in components: very high efficiency meets an easy-to adapt open design for fast customer-specific modifications. All this on market standard PCB measures of 3”x2”, 4”x2” and 5”x3” for the different power ratings – combined with minimal height of only 1”- 1.3”.

With up to 94 % efficiency, the power supplies belong to the top tier. FRIWO also sets new standards for idle power consumption: the DOE VI requirements for external power supplies are exceeded, which is quite unusual for open-frame power supplies. The first lines of the new product series include output voltages of 5 - 48 VDC for power classes of 18 W, 30 W and 175 W. Further power ratings of the new product line are still being engineered and will be launched shortly.

The new HERC series complements FRIWO’s established OF product family: compact, open-frame power supplies for the most demanding applications. Designed for maximum vibration, shock and temperature resistance, the incredible operating life of these devices sets new standards. Support also comes from their compact design, which dispenses with active fans. All the devices are purely convection cooled, which makes them far quieter in operation and avoids the need for a component that is prone to failure.

| Model Selection: Output Specifications |                    |         |                                 |                  |                            |                 |                  |                  |                                 |

\* Forced cooled with 200LFM airflow

\*\* Ripple measured with 20MHz Bandwidth Oscilloscope and 0.1µF/50V ceramic capacitor and 10µF/47V aluminum electrolytic capacitor across the output terminal.

### Input Specifications

|                        |                     |
|------------------------|---------------------|
| Input voltage          | 100-240 V +10%/-15% |
| Frequency              | 50-60 Hz            |
| Input current          | 1800-900 mA         |
| Inrush current (@240V) | <80A                |

### General Specifications

|                          |   |
|--------------------------|---|
| Operating temperature    | -20..+70°C (above 50°C derated output power see derating curve) |
| Operating humidity       | 10..95 %  |
| Operating altitude       | ≤5000 m   |
| Storage temperature      | -40°C..+85°C  |
| Storage humidity         | 10..95 %  |
| Atmospheric pressure     | 50-106kPa   |
| Output voltage tolerance | ±3 %  |
| Line regulation          | ±0.5 %  |
| Load regulation          | ±2.5 %  |
| Turn-on delay            | ≤2 s  |
| Hold-up time             | >10ms (120V)<br>>50 ms (230 V)                                  |
| PCB Material             | FR4   |
| Dimensions               | 101.6x50.8x26.6mm (4"x2"x1.1")                                  |
| Weight                   | 160 g   |
| AC input                 | JST B3P-VH  |
| DC output                | JST B6P-VH  |

### Safety

|                          |   |
|--------------------------|---|
| Safety standards         | IEC/EN/ANSI 60601-1 Edition 3.1, IEC/EN62368:2014 |
| Approbations             | Europe, USA                                       |
| Protection class         | Class II configuration                            |
| Isolation                | Input - Output 2xMOPP                             |
| Leakage Current          | ≤ 100 µA  |
| Flame class              | UL 94 V0  |
| Electric Strength Test   | 4.2kV Input - Output                              |
| Overload protection      | Yes   |
| Overvoltage protection   | Yes   |
| Short circuit protection | Yes   |
